JOIN THE FURNITURE COMPONENTS AND FITTINGS SECTION AT WOODEX 2025.

Woodex 2025 is the leading international trade show for the woodworking and furniture industry. This year's event will take place from 2-5 December 2025, at Crocus Expo, Moscow

With over 3,500 furniture manufacturers in attendance, woodex 2025 is the perfect platform to showcase your latest fittings and components.

WOODEX 2023 HIGHLIGHTS

- **Impressive Scale:** The exhibition spanned across a vast 18,000 square meters.
- **Global Reach:** Over 210 exhibitors from 8 different countries showcased their products and services.
- **Strong Visitor Turnout:** More than 8,190 visitors from 26 countries attended, representing a significant 42% increase compared to 2021.
- **High Purchasing Intent:** A substantial 74% of attendees expressed plans to make purchases following the exhibition.
- **Target Audience Focus:** Woodex was the exclusive choice for 55% of visitors interested in similar exhibitions.
- **Industry Impact:** A total of 3,511 furniture manufacturers were present to explore equipment, fittings, and components for their production needs.

WHY EXHIBIT AT WOODEX

Exhibiting in the furniture components and fittings section offers a unique opportunity to:

Connect with new clients and strengthen existing relationships.

Increase sales volume and reach new markets.

Engage with key decision-makers and close deals on-site.

Increase brand recognition and awareness.

FURNITURE AND FURNITURE ACCESSORIES MARKET IN RUSSIA:

- Russia's furniture industry has experienced remarkable growth, with production surging nearly **40%**. The past year witnessed unprecedented retail activity, primarily driven by domestic players.
- The Russian furniture market is set to expand by at least **15%** in 2024, driven by sustained high demand. This growth is underpinned by the country's robust construction sector, which commissions over 100 million square meters of new housing annually.
- The burgeoning housing market is driving significant demand for furniture. New homeowners require substantial furnishings, propelling industry growth by an estimated **5-20%** annually over the next several years.
- Russia's reliance on imported furniture fittings is overwhelming, accounting for **95-97%** of the market. Ironically, even a global metallurgy leader is compelled to source metal fittings overseas due to exorbitant domestic metal prices and the domestic industry's technological shortcomings in fittings production.
- Russian furniture manufacturers pay a lot of attention for fittings quality and trying to work only with reliable brands. Woodex is the best opportunity to proof the quality of your product so let them buy it directly or from your partners.

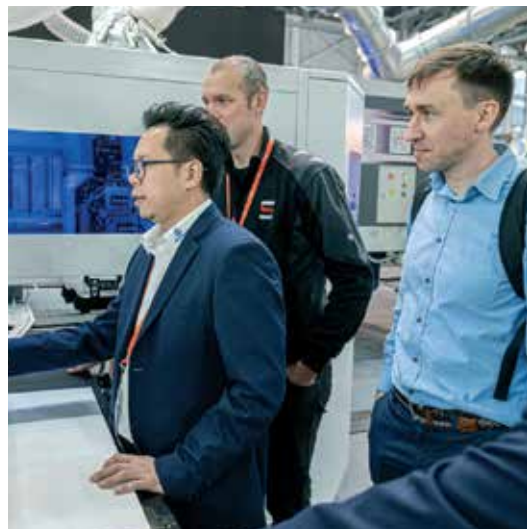

China is the dominant supplier of furniture fittings to Russia, capturing over 70% of the import market. European countries follow, accounting for more than 23% of imports.
